

# Funny Bob Doubles

## Purpose

Funny Bob Doubles is a short method suitable for practising the individual pieces of work in Plain Bob Doubles. It does require a steady band to ring around the person who is learning.

As each piece of work is perfected, the person learning can swap to a different bell, to practise another piece of work.

## Ringing Funny Bob Doubles

Experienced ringers are needed on the treble and the third.

**The treble** plain hunts until the second lead end. After leading, it makes seconds over the third and leads again. If the method is rung continuously, it alternates between plain hunting and making seconds over the third.

**The third** makes seconds over the treble at the first lead end and plain hunts at the following lead. If the method is rung continuously, it will alternate between making seconds over the treble and plain hunting.

**The second** dodges 3-4 down every lead.

**The fourth** makes long fifths every lead.

**The fifth** dodges 3-4 up every lead.

## Tip

The bells pass the treble in different positions on alternate leads.
